

JOIN US FOR A PUBLIC MEETING

Nassau County is committed to improving transportation options for residents, workers, students, and visitors. The County has begun developing a **Shared Mobility Management Plan** (e.g., flexible/on-demand transit, bike share, scooter share, ride hail, etc.) to identify opportunities for new and enhanced transportation services, including options to complement/extend existing transit services.

The plan will further Nassau County's goals to promote environmental sustainability and economic development. Your participation in this public meeting is important to incorporate your input into the plan recommendations.
